Email: xvervolfx@gmail.com

My skills description:

- OOP (Java, Delphi);
- Native (C);
- WEB (HTML, CSS, JavaScript);
- Data Base(MySQL).

Core Skills:

Java SE, J2EE(JPA, Java Servlets), Multithreading, JDBC, Spring(MVC, IoC/DI, JDBC), SQL, JQuery, AJAX, JSON, Maven, JUnit.

During my job I'm use Eclipse, IntelliJ IDEA, Quartus II, Nios II.

I have a basic knowledge: ORM (Hibernate), Spring (Data, Test), XML(DOM, SAX), Tortoise SVN, Log4J, Git, JIRA.

Education:

- Novokakhovsky instrument-engineering technical school. Software Engineering (2007-2011)
- Open International University of Human Development "Ukraine". Development of software and systems - Bachelor(2011 - 2012).
- Open International University of Human Development "Ukraine". Computer system and local area networks - Specialist (2012 - 2013).

Job history:

June 2015 - Current time (5 month totally) - freelance. Refactoring game server to modern technology (for example "Spring (IoC/DI; JDBC; Test)", JUnit) and developing the website(for example "Spring (MVC)") "Web-portal for server MMORPG Lineage 2".

My last official job was in NPF Radian Ltd., in Nikolaev, at position The Software Developer. I worked there from July 2013 - June 2015 (1 year 10 month totally). My general duties was:

- Development the control system for The Engraving Machine (see. Projects: n. 1, 2, 3, 5), developed using technology: JDK, Multithreading, Sockets for work of System Core and communicate with it; Android SDK - UI for limited control; Delphi - UI for OS Windows.
- Hotfix, patches and compatibility packs development. Major and minor releases.
- Technical support of our customers.

January 2013 - May 2013 (5 month totally) . Was developed an application "Free SMS", developed using Android SDK and SQLite technology (see. Project n. 4).

September 2012 - December 2012 (4 month totally). Was developed website - order for info website, by Stationer's Shop "Clerk", developed using PHP, JS, HTML, CSS like UI and MySQL database like repository. (Project was complete -> <http://clerk.in.ua/>).

October 2011 - July 2012 (10 month totally). Information website about cookery (like <http://gotovim-doma.ru/>. Project was closed). Developed using PHP, JS, HTML, CSS like UI and MySQL database like repository.

On this position I completed next projects, now they are ready for use:

1. **EControl Engraving Studio** - software for OS Windows, the main control program and compiling tasks for engraving images on hard surfaces for engraving machines series Granite Cube, Granite Sprint and their modifications.
2. **EControl** - simplified version for remote control and a brief status display devices - Granite Cube, Granite Sprint and their modifications. (**Download from Play Market by NPF Radian Ltd.** - <https://play.google.com/store/apps/details?id=ua.radian.econtrol&hl=ru>)
3. **myEthernet** - firmware (in fact a full-featured, multi-threaded, a background application) for the module, which is at the same time:
 - Interface controllers for interfacing client (Windows and / or Android, via LAN, WLAN or USB interface) controller and stepper motors (Altera Cyclone 4 through RS232);
 - Data storage, such as statistics; the currently executing task, system settings, etc.
4. **Free SMS** - Just for fun when studied JDK and SDK I developed an application based on Android 4.0.4 to send free messages "Call me back" to the operator MTS / Life using the phonebook and the SIM-card contact lists.
5. **FTDI Console** - integration third party control pad with engraving machine or direct device controlling.

Who I am:

Purposeful, proactive, and communicative good guy who quickly learns and can working in the team. I've good analytical mind skill and always try to bring the case to completion. Sometimes my head invents alternative task solution or some new thing and I'm not afraid to express my opinion or offer alternative solutions to team. I've huge interest in complex, large projects, and projects in game development.

I'm ready to take tests or exams and share my projects portfolio.

Also, may be you will find this important I have little experience of Windows, Linux and Android system administration so the same as WEB-development and working with databases.
